

SeaPort-e

Maybank Industries, LLC SeaPort Enhanced (SeaPort-e) Contract

Contract number: N00178-10-D-6162
Solicitation number: N00178-10-R-4000
Contract scope: To provide services and professional support to Naval Sea Systems Command, Naval Air Systems Command, Space and Naval Warfare Systems Command, Naval Supply Systems Command, Military Sealift Command, Naval Facilities Command, Strategic Systems Programs, Office of Naval Research and the United States Marine Corps, as determined by various task orders.
SeaPort-e portal: <http://www.seaport.navy.mil>

Maybank Industries, LLC (Maybank) is proud to be a prime contractor on SeaPort-e, offering a wide range of services supporting all functional areas in SeaPort-e Zones 2, 3, 4, and 6.

Maybank is a woman-owned small business located in Charleston, SC with strong ties to the maritime industry. Maybank and its family of companies provide professional services and solutions serving a broad spectrum of domestic and international customers. From maritime operations and ship design to international project development, technology services, logistics management, agency services, material handling, and an ever-expanding range of innovative information technology solutions, we provide a powerful blend of professional expertise to research, analyze and develop tailored solutions with thorough plans of action. As the ideal shipping, logistics, terminal design and operations partner, Maybank possesses the expertise and experience to advance shore side infrastructure development projects around the world, in support of Navy missions under SeaPort-e.

Maybank also offers solutions to many technology problems related to the industry through its subsidiary Maybank Systems. The Maybank Systems team was born of efforts to automate the international logistics concerns of break-bulk carrier, Maybank Shipping. Maybank Systems has since rapidly diversified to service clients in a wide variety of niches throughout Charleston and across the United States and into the international sector. Maybank Systems has been operating since 2002 as a premiere full-service IT Management Company in the Charleston area. The Maybank Systems focus is to provide high level expertise with the best response times in the area. Maybank offers services ranging from per-call emergency support to regular systems management and maintenance through full-time staffing and management of customer IT needs.

Team Members

Maybank has partnered with top-performers CenTauri Solutions, LLC (CenTauri) and Ciera Logistics, LLC (Ciera), to provide a wide breadth of programmatic services to the Navy across Zones 2, 3, 4 and 6. Maybank, CenTauri, and Ciera together make up the Maybank SeaPort-e Team (the Team).

CenTauri Solutions, LLC

CenTauri Solutions, LLC provides program management, information systems and technology, systems engineering, subject matter expertise and other capabilities to key components of the Intelligence, National Security and Homeland Security communities. Totally committed to customer mission, responsiveness, and innovative thinking, CenTauri consistently brings critical domain and technology expertise to key customer projects.

Ciera Logistics, LLC

Ciera Logistics, LLC is a veteran owned minority business based in Waldorf, MD. Its consultants provide expert knowledge in supply, financial, warehousing, configuration management, and logistics program support to various DOD and Navy Organizations. Its team of seasoned veterans diligently works alongside Navy and industry professionals, enabling its clients to maximize their success in meeting key program objectives in areas such as cost, schedule, and performance.

The following table represents the Team's breadth of experience by functional area, over the last three years. More detailed information is available by contacting the Maybank SeaPort-e Program Manager.

SeaPort-e Task Orders

This space will be used to list Maybank SeaPort-e Task Orders.

Quality Assurance

Quality is built into every part of Maybank Industries' management approach, project management processes, task order performance, and performance assessment criteria. It is a success measurement that is continually monitored from the technical level through top leadership. Our quality assessment process includes establishing success metrics and communicating them among all stakeholders, creating task-level quality control actions at all stages of the project, capped by quality assurance checks at the corporate level.

Quality plans begin with requirements and project objectives. Upon task order acceptance, specific and quantifiable goals are defined in conjunction with the customer and project objectives are set to exceed them. For performance based contracts, a quality assurance surveillance plan is developed in line with performance metrics and the expectations of the customer. Deliverables will be evaluated against these standards.
